

Passo San Pellegrino  
Italian Dolomites

*Paradise in winter, paradise in summer – Rifugio Fuciade is a breathtaking experience to be treasured forever. Unforgettable memories of a hideaway where life stops still.*

Hidden away in the Fuciade basin amidst outstanding scenery and nature is Rifugio Fuciade, an old 'baita' transformed into a cozy, atmospheric and very comfortable mountain lodge – a quite unique and heavenly getaway in both summer and winter.

Creation of the remarkable local Rossi family, Rifugio Fuciade is surrounded by the Costabella Group with views of Pale di San Martino and Col Margherita and provides guests with a memorable and authentic experience steeped in the local Ladin traditions. There are just seven rooms and each has been designed individually with focus on both modern comfort and traditional style and character. All have fabulous views, some have balconies and several even have their own steam room or Jacuzzi bath. High quality fabrics of the area have been used together with a glorious array of art pieces providing guests with a truly memorable and magical genuine yet luxurious mountain experience.

Dining at Rifugio Fuciade is none other than a total delight! The cuisine here is exceptional and a major focus of one's stay. With Martino Rossi at the helm one can experience the finest dining of the nearby valleys using local ingredients and traditions but with a twist of modern flair and innovation. Breakfasts are also a feast with all the cakes and breads made at the lodge as well as jams and fruit preserves. Whether one is heading off in the morning for big day on the ski slopes or a major hike in the summer, it is guaranteed that when it comes to dining at the start and the end of the day one will not be disappointed! Venture down into the basement and THE most splendid cellar awaits anyone who is an enthusiast of fine wines. Sergio Rossi will accompany you around this fascinating labyrinth dug in the rock below the lodge – his collection began in 1983 and he has collected more than 700 refined, national and international wine labels but with a particular emphasis on local winemakers of Trentino and Alto Adige.

Rifugio Fuciade really is something special and in all honesty, it is somewhere which has to be experienced in person and, once you have been,

you will certainly wish to return. In the ski season one's breath is taken away by this remote winter wonderland far away from everything and in the summer it provides anyone passionate about hiking in the Dolomites with a haven of serendipity. Combined with Locanda degli Artisti in Canazei, Rifugio Fuciade contrasts perfectly and an ideal hideaway and contrast to its more contemporary and equally welcoming and enticing sister hotel.

Merrion is thrilled to include Rifugio

Fuciade in her portfolio - ideal for couples and families and also a fantastic location to be taken in exclusivity and as part of a Dolomiti ski safari.
